

FEATURES

Concentrator module for WPS Multiplex system, it receives the signals from preamplifier of sensible wire PWPSI03/N, up to 8 units, and analyze its to determine the system alarm conditions. The alarms signalizations are sent to the MIND unit via the BUS communication line COM1 I5.

It is normally installed closet o the fence to allow the connections of 8 WPS preamplifier.

TECHNICAL SPECIFICATIONS

Applications	Concentrator to manage up to 8 WPS wires
Power supply	24-55Vcc, 60 mA (max) @ 48 Vcc
Input	Signal from the WPS preamplifier; PWPSI06/SA
Relays output	2 output sw programmable + 8 optional
Load rating	12V (max), 100 mA (NC contact, with 22 Ohm series resistor)
BUS connection interface	Serial line COM1 I5
System parameters setup	Via Software
Dimensions	260x 160x 90mm
Weight	2 Kg
Box material	Aluminium
Working temperature	-30°C - +70°C
IP Protection	IP68
Installation	Suitable for outdoor installation, also in marine environmental
